22/07 Status, trade, market and product development

- Publication of system price curves

The background on this topic is the discussion about publication time that we discussed last meeting. Since that it has been decided that the curves will be published D+1, but the question now is in which form. There were comments last meeting that the preferred form was in data points rather than pdf-pictures. NPS asks the group for their opinion on preferred form for this publication.

23/07 SESAM

In Exchange information no 49 2007 NPS informed that the planned launch was postponed until the 9th October 2007 instead of 4th September.

25/07 New Rulebook

The work with NPS new rulebook is almost finished and the new rulebook is scheduled to be published ahead of the meeting. Please check the webpage before the meeting for more information and get familiarize with the new rulebook.

26/07 EURO Task Force

During the summer NPS have conducted an internal study of EURO as single trading currency in the Elspot market. NPS would like to discuss this question with the product group.

27/07 Nordel related information

- Ramping on HVDC links

On the 9th September Nordel informed the market (Exchange information no 53 2007) about extended use of ramping on HVDC links. Today there is ramping constraints on KontiSkan and Skagerrak and when this extended ramping will come into force the following interconnections are included.

- SwePol (Sweden <-> Poland)
- Baltic Cable (Sweden <-> Germany)
- Kontek (Denmark East <-> Germany)
- KontiSkan (Sweden <-> Denmark West)
- Skagerrak (Norway <-> Denmark West)
- NorNed (Norway <-> the Netherlands)

- Prognosis for trading capacities

Today NPS publish weekly capacity prognosis from the TSOs on the web. NPS would like to discuss the worth and the use of this prognosis.
